SIBS NJ (Supportive Initiatives for Brothers and Sisters)

Time: 7:00–8:30 p.m.

Neurotypical siblings of children and adults with disabilities have unique needs and oftentimes parents and providers don't know what those needs are or how to address them. This presentation will provide an overview of how siblings often experience and perceive disability, assist parents and providers in recognizing the difficulties that can be present for siblings in their various roles, discuss ways to offer support to siblings, and present effective strategies for initiating difficult conversations about disability with children and teens.

Siblings 12 years and older are welcome to attend with parents/guardians.
